

Didats Triadi

Web Application Developer and Designer

didats@gmail.com

Summary

Web Application Developer who able to design. Over 5 years experiences in website development.

Fall in love with JQuery, Wordpress and Codeigniter.

Personal Projects:

I have 4 little game application which built using HTML5 and CSS3.

Kistaka (<http://didats.net/projects/kistaka>)

Kistaka is a word quiz game. Its allowed you to test how well you know the Indonesian language. The application is similar like Test Online or something like that.

Ketaketik (<http://didats.net/games/ketaketik>)

Ketaketik is a typing competition game. You type the words that showed from the bottom of your browser to the top. It's similar with all other typing game, but most of them are using Flash, while Ketaketik is purely HTML5 and Javascript.

Taktak (<http://didats.net/games/ketaketik>)

Taktak is almost similar with Hangman game. You will need to complete a word by putting a character at the boxes.

Teektak (<http://didats.net/games/teektak>)

This is another Indonesian word game. You need to build words from 15 letters.

Commercial Project:

Portfolio page is available upon request.

Specialties
